Feb 24, 2013 I tried to upgrade my router firmware to the latest 2 1 39 145204 (downloaded from cisco website) but seems like the upgrade didn't go well.. I want to do the update because as of now, the router can't see my drive connected on usb (one ntfs partition and another one called wbf, maybe that one is causing the issue about the drive).. 0 firmware?Aug 4, 2012 I just purchased a new E1200 router with firmware version 2.. I redownloaded it and tried again with the same error How to get past this and upgrade the firmware?Oct 18, 2012 The file uploads fine, but I get an error message saying the router can't be updated atthe moment.. For now, how I can get the firmware upgrade for the WRK54G? Similar Messages:
..... ADVERTISEMENT Sep 22, 2011 I found this router still in box and am now using it. [Behringer X32 Driver Mac Download](#)

I want to update the firmware because i am having issues with it It has what i assume is the original Firmware 1.. 0, 1 1, 2 0, 3 0, etc There is no 2 1 listed, so does this mean I can use the v2.. When I choose the downloaded file and try to start upgrade I immediately get an error 'The Image File is Incorrect'.. ” Since the suggested solutions to so many problems posted in the forum is to first upgrade the firmware, I find this response with no explanation quite annoying. It keeps showing 'Waiting' at the center of the page forever I have tried to do the 30/30/30 reset to no avail, i tried to do tftp downgrade to older firmware version but the tftp boot doesn't even start.. 0 01 and downloaded the latest version 2 0 03 and tried to install it through the router.. I am unable to open the admin webpage I can get to the login page on 192 168 1 1, after i enter the admin password the next page doesn't load.. Questions regarding that problem I will post under a different topic Get help with WRK54G Downloads.. Linksys Wireless Router:: Firmware Upgrade For WRK54G Jan 9, 2012 There is no "firmware" number after the model and I believe this router has never had a firmware upgrade.. The firmware is 1 55 02 Cannot get upgrade as not available from Cisco Have disconnected all other devices from the network in case there is some interference problem. ae05505a44 [App Market Download](#)
